

Bishop Fenwick High School Athletic fundraising/community service policy

Any coach wishing to engage in a fundraising activity for their individual program and/or a community service project, must secure permission from the Athletic Director prior to any engagement in such activities.

The Athletic Director will work collaboratively with both the Development Office and the Campus Ministry Department in determining the feasibility of any fundraising or service activity involving Fenwick athletic teams.

Below is the form to be used for either a fundraising activity or community service project for a designated athletic team.

We, as a school (Through Julie Yost as service director) are going to have a few (2-4) charities/foundations/organizations which we support in a given school year. The goal is to have all of Fenwick supporting these fewer organizations, providing wider support to those organizations which we do support.

Individual groups/clubs/teams can propose a service project which supports these causes which Fenwick has named each school year. This can include physical service or raising money for donation.

As far as the "what" can be done to raise money, we want fundraisers which are service and program based. Ideas that do not place additional financial responsibilities on parents should be a high priority. Any additional support in regards to sponsorship should always be ran through development (Mike Raiff) by way of the AD.

Request for permission of fundraising/community service project

Sport: _____

Coach: _____
